Know The Process

Application based security monitoring system

We at Absolute have an application based security guard monitoring system for continuous security guard tracking at your premises to ensure the security guards stay on their toes. In this system, the guard will scan the QR code affixed at strategic locations to ensure timely security checks at predefined intervals at your premises. A report of the same on a periodic basis is prepared to help to patrol across the defined perimeter which can be shared with our clients as well. **This service is available at a very small additional prize.** All of this is done to make sure that the security guard is alert and is on his toes. **Most importantly we can offer you even better services.**
