Know The Process

Security audit during deployment at a new site

We have introduced a new process of auditing all the new sites via video recording. A video of the complete site is recorded and audited by our team at the head office. The team ensures that CCTV cameras are installed and are in working conditions at the site. They also look for the number of operational gates at the site and ensure that each such gate has at least 1 security guard deployed. The complete periphery of the premise is watched closely to ensure there are no loopholes as per the security point of view. Neighbouring sites/plots are also checked in the process and ensured to avoid any mishap. Any abnormality is discussed with the client on an immediate basis to rectify the same. All this is done for the smooth deployment and functioning of security guards at all our sites.
